

Dried apple

01 / Product perspective

LOOK BEYOND THE DRIED WEIGHT

Added sugar, moisture, sulphites and drying method can change both nutrition and processing behaviour. Compare the declared ingredient list and the offered form before using a generic nutrient profile in product development.

NUTRITION REFERENCE | PER 100 G EDIBLE PORTION

Reference food: Apples, dried, sulfured, uncooked

ENERGY

POTASSIUM

450.0 mg

USDA comparator, not a Brazilian lot certificate or finished-product nutrition label. Edible tissue excludes bones. The raw/dried state and trim shown in the reference description determine the comparison; cooking, refining and added ingredients may change it.

HOW TO USE THIS INFORMATION

Dehydration concentrates the edible material, while added sugar changes the composition. Use the actual recipe and residual moisture for final label work.

RESEARCH SOURCES

USDA FoodData Central, SR Legacy: FDC ID 171691.

Dried apple

02 / Practical evaluation & sourcing

TRANSLATE THE APPLICATION INTO MEASURABLE ACCEPTANCE

For Dried apple, compare samples under the same production conditions. Agree the measurement method and acceptance limits before using the result to assess a commercial shipment.

YOUR PRODUCT-SPECIFIC TRIAL BRIEF

01 / Slices, dices or other cut: state the target, reporting unit, test method and acceptable variation. Ask for a result tied to the sample and proposed lot, not only a general catalogue statement.

02 / Peel status and piece size: state the target, reporting unit, test method and acceptable variation. Ask for a result tied to the sample and proposed lot, not only a general catalogue statement.

03 / Moisture and texture: state the target, reporting unit, test method and acceptable variation. Ask for a result tied to the sample and proposed lot, not only a general catalogue statement.

04 / Added sugar and sulphite declaration: state the target, reporting unit, test method and acceptable variation. Ask for a result tied to the sample and proposed lot, not only a general catalogue statement.

INGREDIENT DECLARATION

Added sugar or coating changes the final composition.

Request: Full ingredients, additives and sugar-treatment statement.

WATER ACTIVITY

Moisture percentage alone does not establish stability.

Request: Water-activity result and validated storage/shelf-life conditions.

SULPHITE REQUIREMENTS

Buyer labelling rules depend on the destination and concentration.

Request: Use declaration and analytical result if relevant.

REHYDRATION AND CUT

Size and process history influence the final texture.

Request: Cut tolerance and an agreed rehydration or baking trial.

STORAGE AND DOCUMENT BASIS

Agree the storage conditions, shelf life and pack protection for the actual product. Request sample/lot identity, ingredients where relevant, analytical results and destination-specific documents.

Research reference: Codex Alimentarius - official commodity standards
