

Cashew kernels

01 / Product perspective

MATCH THE SEED TO THE PROCESSING STEP

Whole kernels, broken pieces, skin removal and roasting each affect the finished ingredient. Nutrient values vary with water content and added ingredients. Evaluate the offered form in the intended roasting, grinding or blending process.

NUTRITION REFERENCE | PER 100 G EDIBLE PORTION

Reference food: Nuts, cashew nuts, raw

USDA comparator, not a Brazilian lot certificate or finished-product nutrition label. Edible tissue excludes bones. The raw/dried state and trim shown in the reference description determine the comparison; cooking, refining and added ingredients may change it.

HOW TO USE THIS INFORMATION

Fat, protein and fibre describe a concentrated ingredient. The final recipe and inclusion level determine the contribution to a finished product.

RESEARCH SOURCES

USDA FoodData Central, SR Legacy: FDC ID 170162.

Cashew kernels

02 / Practical evaluation & sourcing

TRANSLATE THE APPLICATION INTO MEASURABLE ACCEPTANCE

For Cashew kernels, compare samples under the same production conditions. Agree the measurement method and acceptance limits before using the result to assess a commercial shipment.

YOUR PRODUCT-SPECIFIC TRIAL BRIEF

01 / Kernel grade and count: state the target, reporting unit, test method and acceptable variation. Ask for a result tied to the sample and proposed lot, not only a general catalogue statement.

02 / Whole, splits or pieces: state the target, reporting unit, test method and acceptable variation. Ask for a result tied to the sample and proposed lot, not only a general catalogue statement.

03 / Colour and defect limits: state the target, reporting unit, test method and acceptable variation. Ask for a result tied to the sample and proposed lot, not only a general catalogue statement.

04 / Moisture and microbiological requirements: state the target, reporting unit, test method and acceptable variation. Ask for a result tied to the sample and proposed lot, not only a general catalogue statement.

SIZE AND INTEGRITY

Whole-kernel yield can change the useful purchase cost.

Request: Size/count class and agreed broken-piece tolerance.

FRESHNESS

Appearance alone cannot establish oxidative condition.

Request: Moisture, sensory profile and oxidation tests where appropriate.

ALLERGEN CONTROLS

Ingredient identity and cross-contact need separate review.

Request: Allergen statement and documented handling controls.

PROCESS TRIAL

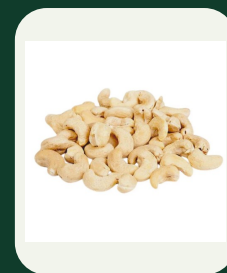

Roasting or grinding changes sensory and functional behaviour.

Request: Trial conditions and target colour, texture or grind profile.

STORAGE AND DOCUMENT BASIS

Agree the storage conditions, shelf life and pack protection for the actual product. Request sample/lot identity, ingredients where relevant, analytical results and destination-specific documents.

Research reference: Codex Alimentarius - official commodity standards
